

TR-21 Fact Sheet

Mitsubishi Electric Power Products, Inc. will build a facility in Memphis, Tennessee that will be the headquarters for the company's heavy electrical equipment production in North America.

About the project...

- A 350,000 square-foot factory and office building on a 100-acre waterfront site in Rivergate Industrial Park
- Products: Shell-type power transformers for the following applications:
 - Generator step-up transformers
 - Step-down power transformers
 - Autotransformers
 - Shunt reactors
- Transformer capacity: 300MVA and larger
- Transformer operating voltages: 161 kV to 765 kV
- Transformer weight: in excess of 400 tons
- Start of operation: April 2013
- Investment: \$200 million (approx.)
- Employees: 275 at full capacity

Large power transformers with extra-high voltage ratings will be the first products manufactured at Mitsubishi Electric Power Products' new Memphis factory.
