

UNINTERRUPTIBLE POWER SUPPLIES

News Release

CoreSite Chooses Mitsubishi Electric Power Products’ Uninterruptible Power Supplies for Santa Clara Data Center

WARRENDALE, Penn. – August 3, 2011 – [CoreSite Realty Corporation](#), a national provider of powerful, network-rich data centers, has chosen [Mitsubishi Electric Power Products, Inc.](#) to provide Uninterruptible Power Supply (UPS) units for their 101,000 square-foot data center in Santa Clara, Calif. CoreSite cited Mitsubishi Electric’s [9900B UPS](#) series’ overall energy and cost-efficiencies and flexibility as reasons for its selection. CoreSite’s Santa Clara data center was completed on July 21, 2011 and is the sixth CoreSite data center and colocation facility to feature Mitsubishi Electric UPS products.

CoreSite’s newest facility is the second of four planned data centers at the company’s Santa Clara campus. The first on-campus data center has posted Power Usage Effectiveness (PUE) levels of 1.3 and Mitsubishi Electric’s 9900B units are expected to contribute to an even lower PUE at the new data center, leveraging their 97 percent efficiency rating. Mitsubishi Electric UPS products also contributed to the LEED Gold certification and Silicon Valley Power’s Energy Innovator Award, both received at CoreSite’s 2901 Coronado data center in July of 2011.

“CoreSite considers the energy efficiency of its data centers to be of the utmost importance,” said Billie Haggard, senior vice president of data centers at CoreSite. “Our Santa Clara data center campus will be one of the nation’s most energy efficient and Mitsubishi Electric’s 9900B UPS units are an important component in achieving our energy efficiency goals. Mitsubishi Electric Power Products worked closely with CoreSite to provide custom UPS solutions that deliver optimal reliability, efficiency, and capacity management to our data centers.”

“Mitsubishi Electric’s 9900B UPS offers the most efficient, on-line double conversion in the industry at all load levels, with up to 97 percent efficiency at [unity power factor](#),” said Dean Datre, general manager, Mitsubishi Electric Power Products UPS division. “We are happy to
