

**Mitsubishi Electric Power Products Ozone Systems Division Awarded AWWA Green Ribbon**

WARRENDALE, Penn. — August 24, 2011 — [Mitsubishi Electric Power Products, Inc.'s](#) Ozone Systems Division was presented the “[Green Ribbon](#)” award by the [American Water Works Association](#) (AWWA) for its [ozone generation systems](#) and environmental initiatives. The award was presented at AWWA’s annual convention in Washington D.C in June.

Mitsubishi Electric’s ozone systems are environmentally beneficial because they replace chemical disinfection of drinking water. They feature small-diameter glass dielectrics to save space, and high ozone generating capacity per electrode, which reduces power and oxygen consumption.

In North America, ozone is increasingly becoming the choice of municipalities and large industry for drinking water and waste water treatment. Mitsubishi Electric began its ozone system business in 1968, and since entering the North American market in 2004 has installed systems in numerous locations across the United States.

**About Mitsubishi Electric Power Products, Inc.**

Headquartered in Warrendale, Pennsylvania, Mitsubishi Electric Power Products, Inc. is a US subsidiary of Mitsubishi Electric Corporation, responsible for serving the North American power systems, rail transportation and water treatment industries with electrical and electronic products, systems and services. Products include gas circuit breakers, gas insulated sub-stations, electricity transmission technologies, ozone water treatment systems, uninterruptible power supplies, rail transportation equipment, and stadium and arena displays.
